Hospital Visitor Access Policy

Document ID: HVA-COMPACT Version: 2.0 Owner: Hospital Operations Fictional demonstration document

Purpose and context

This document describes visitor access arrangements for inpatient wards. It was prepared after discussions with Security and ward staff. The information supports a welcoming and orderly hospital environment.

Policy rules

1. General visiting hours

General visitors must leave inpatient wards by 6:00 p.m. daily, unless the nurse in charge authorizes an exception.

2. Visitor registration

Before allowing a general visitor beyond the security desk, Security staff must verify one government-issued photo ID and record the visitor's name, destination, and arrival time.

3. Visitor badges

General visitors must wear the issued visitor badge above the waist while inside the hospital and return it when leaving.

Explanatory note

A visitor arriving shortly before closing may hear a closing-time reminder at the security desk. This is an example of a conversation, not an additional policy requirement.
